# With more than 30 Crores reach

Astro Arun Pandit, a spiritual leader, and astrologer is farsighted humanitarian with a strong will to change the perception of how people see Astrology today. He has transformed 50,000 lives through his Astro-spiritual consultation calls.

From a simple boy of Ayodhya who started observing life-changing effects of astrology from his father to living his teenage on a monastic lifestyle to one of the most followed spiritual astrologers of India, his journey is quite inspiring.

In this materialistic world, It was his very urge of helping people and doing something good for society that inspired one of the brightest students of prestigious Delhi University to change his career direction towards the unforeseeable field of astrology.

# His Mission

Astro Arun Pandit believes astrology is mystic science based on the logical framework of predictive sciences and aims to create such a social impact so that Vedic astrology becomes an effective solution to human suffering.

Astro Arun believes that humanity is far away from its astrological potential and humans haven't even scratched the surface of this astonishing science. There is so much to know, learn and discover that we can't possibly imagine at this point in time.

The westernization of problem-solving techniques has led astrology to be believed as a mere formula based on a simple calculation. The ignorance of the science and logical reasoning behind astrology has led to this condition. Astro Arun's main motto is to establish back faith in Vedic astrology.

# His Vision

Suffering is natural, undeniable and a part of human life and Astro Arun wants people to deal with their hardships skillfully and that can be done with the help of Vedic astrology. In short, he envisions a human society that doesn't suffer suffering.

Astro Arun wants to democratize Vedic astrology in a way that it reaches every part of this world cause he believes that peace can only be attained when something is not centralized to a particular person or community. To accomplish his goal He started spreading the word about logical astrology through new media platforms today has a massive amount of supporters on these platforms and this is just the beginning.

He has also launched his predictive science-based astrology and numerology courses to make astrology accessible to the world. By far he has successfully taught five thousand+ students through his course.

**“Where come life there comes suffering and where come sufferings there comes astrology!!”**

- ASTRO ARUN PANDIT

# How our **collaboration** will help **Indians**?

As an influencer, it is your responsibility to positively influence youngsters to do something good for our society and add value to our country and you are doing it quite well. We need more people like you who own their responsibility & genuinely play a role as real influencers.

**In our previous live sessions, we have got an average of 30,000 live viewers throughout the session.**
